SUMMARY

Data and analytics leader with 13+ years at Cisco, leading analytics transformation across enterprise insights, self-service analytics, AI-enabled decisioning and product releases, KPI trust and commercial decision support. Track record includes $11M+ in investment decisions, millions in potential asset management savings through AI-based laptop performance analytics, $4.3M in productivity savings, $1M in avoided asset charges and 2.9x better vendor value. Strongest in bridging data, technology and business outcomes through trusted insights, technical understanding, executive storytelling and measurable commercial impact. Complements enterprise leadership with hands-on independent development of Agentic AI prototypes, including multi-agent workflows and orchestration using Claude Code, Claude API and Python.

EXPERIENCE

Data Solutions & Insights Leader / Product Owner, Cisco, June 2019-July 2026
Sydney, Australia

- Led a team of analysts, data scientists and engineers delivering enterprise insights, data products, decision-support models and AI-enabled analytics across complex operational datasets.
- Owned a multi-year analytics roadmap across KPI measurements, self-service analytics, AI-enabled insights, data quality, governance, forecasting and commercial decisioning.
- Strengthened enterprise KPI trust by increasing consistency across **27 service KPIs from 62% to 100%**, reducing duplicate Power BI dashboards from **70+ to 46** and **cutting KPI escalations to zero**.
- Prioritised analytics initiatives through stakeholder engagement, requirements gathering and Agile delivery planning, balancing business value, complexity, capacity and milestones.
- Led development of an AI assistant for global IT support function producing AI case summarisation and Q&A, reducing case-spike analysis **from 4-days to near-instant insight** and improving proactive issue management.
- Led an AI-based laptop performance methodology using device observability to classify usage, identify underperforming devices, guide refresh actions, improve stock forecasting and support **millions in potential global asset management savings** and reduce over-provisioning risk.
- Scaled ThoughtSpot AI-powered self-service analytics adoption by **326%**, from **46 to 196 weekly active users**, and increased monthly query volume from **8.1K to 19.2K**, reducing data request workload by **33%** and avoiding short-term dashboard development projects by **67%.**

- Built the commercial case for ThoughtSpot AI-product capacity uplift, showing the $70K / 250M-row option delivered **2.9x better value** than the $40K / 50M-row option, with **65% lower cost per million rows** and **5x the capacity for only 1.75x the cost.**
- Built the commercial case for adopting the M5 MacBook Air as Cisco's standard Mac offering, showing it met the needs of 87%+ of global Mac users while delivering **1.5x the performance** of M4 MacBook Pro, **2x the performance** of M3 generations, costing **23% less** than the new M5 14-inch MacBook Pro and less than half the cost of the M5 16-inch MacBook Pro.
- Built an evidence-based Finance proposal for higher-spec laptop model investment, using Python, anomaly detection, GenAI-assisted summaries and data storytelling to link rising CPU/RAM pressure to AI developer workloads and influence future AI-ready device budget planning.
- **Reduced AI token waste by 40%** by analysing token usage, refining prompts and reviewing GenAI use cases for efficiency and relevance.
- Modernised data foundations across Snowflake and DBT, strengthening transformation, lineage, catalogue, quality and release practices while **reducing data warehouse volume by 42%** and **removing 517.2M stagnant rows**, improving platform resiliency and reliability for **200+ internal customers**.
- Partnered with data engineering, governance, privacy and European Works Council stakeholders to improve Snowflake ingestion, DBT migration, data quality, lineage, reporting reliability and responsible employee data use.

Independent AI Product Development, Claude Code, June 2026-Current

- Built a five-agent AI workflow incorporating orchestration, specialist agents, task handovers and human approval gates.
- Applied prompt engineering, workflow testing and token-usage tracking to explore controlled multi-step AI automation.
- Developed an interactive KPI Creator agent simulation demonstrating agent collaboration, approval checkpoints and dashboard outputs.
- Portfolio: https://adamaziz1979.github.io/AI_Build_Log/

Lead Analyst, Cisco, June 2017-June 2019
Sydney, Australia

- Built the foundations for a new data function, directing analytics effort toward high-value business problems, priority service areas and operational performance improvement.
- Developed business value cases for IT programs worth **$11M+**, clarifying expected value, savings, delivery priorities and investment trade-offs for senior leaders.
- Reduced Blue Screens of Death and Cisco application crashes through root-cause analysis, saving up to **$4.3M in productivity hours** across **34.4K employees**.
- Worked extensively with global Windows, Mac, Linux and mobile teams supporting approximately 150,000 laptop and mobile devices across OS and security compliance, upgrades, driver management, software asset management, device performance, hardware refresh cycles, stock forecasting and global supply and demand.

- Supported service desk operations by applying text analytics to quarterly support-case data across 200+ services, identifying demand peaks, recurring issues and areas requiring proactive intervention.
- Improved stakeholder satisfaction by streamlining analytics intake, reducing delivery delays and improving the speed and quality of decision-support outputs.
- Built an analyst community across IT, improving knowledge sharing, delivery consistency and capability uplift through quarterly show-and-share sessions.

Senior Business / Data Analyst, Cisco, July 2012-June 2017
Sydney, Australia

- Delivered enterprise BI, reporting and visualisation across IT services to support planning, investment decisions, operational improvement and executive reporting.
- Improved business value case accuracy by **80%** by strengthening data analysis, reporting logic and measurement of expected benefits for IT programs.
- Reduced manual reporting by **65%** through BI automation, improving reporting speed and freeing analysts to focus on higher-value analysis.
- Avoided **$1M** in global asset management charges by using analytics to identify and resolve asset data and allocation issues.
- Developed global data visualisation standards, improving dashboard consistency, usability and stakeholder trust in reporting outputs.

Data & Reporting Analyst, Department of Innovation, Science & Research, September 2011-July 2012
Canberra, Australia
Analysed research data from 42 Australian universities to support accurate allocation of $1.64B in Government research block grants, including data modelling, what-if analysis, ad hoc reporting and stakeholder recommendations.

Project Officer, Australian Competition and Consumer Commission, March 2009-February 2010
Brisbane, QLD
Improved reporting processes, operational transparency and resource allocation across the Product Safety Group by consolidating reporting, eliminating duplication and coordinating IT improvements.

Corporate Training and Education Leader, Procter & Gamble, Lado International College and Nova Group, August 2002-March 2009
Osaka, Japan
Designed and delivered corporate training and business communication programs across Japan and South Korea, leading new-hire training, capability development, coaching, performance evaluations and promotion assessments.

CERTIFICATIONS

- Building with Claude API - Anthropic, 2026 (in progress)

- Claude Code 101 - Anthropic, 2026
- Generative AI with Snowflake - Snowflake, 2025
- Agentic AI and AI Agents for Leaders - Vanderbilt University, 2025
- Enterprise Design Thinking Practitioner - IBM, 2025
- Certified SAFe® 6 Product Owner/Product Manager - Scaled Agile, 2024
- Python for Data Science and AI - IBM, 2021
- Data Science for Leaders - North Carolina State University, 2021

HONOURS & AWARDS

- 2x IT Leadership Program Host at Cisco Live (2024-25)
- ANZ Mentor of the Quarter (April, 2023)

EDUCATION

Bachelor of Arts
Visual Arts, Australian National University, Canberra August 2001

SKILLS

Leadership & Strategy	Data & analytics strategy, people leadership, business prioritisation, stakeholder engagement, executive storytelling
Insights & Decisioning	Insights-led decisioning, KPI frameworks, forecasting & trend analysis, predictive/prescriptive decisioning
Data Product & Enablement	Data product ownership, Agile backlog management, Jira Cloud/Align, self-service analytics
AI, Governance & Platforms	Agentic AI & prompt engineering, token optimisation, AI-enhanced analytics, AI assistants, data quality, privacy and governance, Claude Code / Power Automate, Snowflake / DBT, SQL / Python, Power BI / ThoughtSpot / Tableau
